

Concrete Affidavit

I, _____ with _____
(Name) (Company)

requesting a permit for concrete work at:

(Location)

I have been advised that the City of Lackawanna New York, enforces the following:

*Concrete work shall **not** be permitted where any of the following conditions occur:*

- Where the driveway apron is planned to be expanded;
- And/or a curb cut is requested.

Along with the application for the concrete work, I have submitted a sketch for the location of the driveway including the sizes. The sketch will not be deviated from in any way. I understand that curb cuts and the addition of an apron will only be **approved by code enforcement** if the property does not currently have a driveway, or a driveway is being expanded due to a garage expansion from a single to a double and the approach will not exceed 20 feet.

I have been advised that if any concrete work does not match the plan that is submitted it will need to be removed at the property owner's/contractor's expense.

I have been advised that if the driveway apron is expanded and/or a curb cut is completed it will need to be removed/repaired/brought back to original size at the property owner's/contractor's expense.

In order to obtain a concrete permit from the City of Lackawanna, I hereby represent to the City of Lackawanna that the concrete work planned meets the requirements noted above.

If I am found to be non-compliant with requirements noted above, both the Contractor, and property owned could be subject to fines up to \$250 per foot, and also be required to remove any new concrete, and then properly install the concrete as originally specified. False statements made hereunder may be punishable as a Class A misdemeanor.
